Circular

The plastic waste has emerged as one of the biggest environmental concerns adversely impacting the soil, water, health and well-being of citizens at large. The limited waste disposal systems have become a challenge to dispose of old plastic waste materials, especially the single use plastic. To strive to make the campus plastic-free by systematically banning use of plastics and replacing the same with suitable environmental friendly substitutes like cloth bags or bags made of biodegradable oxystarch should be used.

This issues with the approval of competent authority.
