**BREASTFEEDING SUPPORT DURING COVID-19 PANDEMIC**

- Wear facemask while feeding and handling the baby, if COVID is suspected / confirmed
- Wash your hands before & after touching the baby and frequently disinfect your hands
- Routinely clean and disinfect the frequently touched surfaces
- Avoid kissing / keep your mouth in baby's face and also avoid crowd
- cover your mouth and nose while cough and sneeze
- seek early medical care, if you are sick
- If you are too ill to breastfeed, express the milk/ get donar milk from milk bank and feed the baby safely
- Get your COVID vaccine on time. Breastfeeding should be continued after vaccination

irrespective of COVID-19 all mothers can breastfeed their babies

**WORLD HEALTH ORGANIZATION**
